

BARNET HOSPITAL

Barnet Hospital is a major hospital in north London, providing general and specialist care. Every year the hospital treats over half a million patients from Barnet, Enfield, Haringey, East Harrow, South Hertfordshire, South Essex and Waltham Forest, offering high quality, specialist hospital treatments and therapies.

KEY FACTS

NAME: Barnet Hospital
CLIENT: Metier Healthcare
DURATION: 47 months
LOCATION: Barnet, London, UK
SECTOR: Healthcare
AWARDS: N/A
TYPE OF WORK: Extension

We were appointed to build an extension to Barnet Hospital, with the development financed through a PFI solution. The new wing spans 25,000m², and includes a new intensive care ward, a maternity ward, an emergency room, cardiology and orthopaedics outpatients' services, a dispensary, and an analytical laboratory.

In February 2003, the extension was completed on time and opened by HRH The Princess Royal. The hospital now has 445 beds and provides a full range of acute medical services, including 24-hour accident and emergency care, intensive care, internal medicine, surgery, gynecology, orthopaedics, anaesthetics, haematology, stroke medicine, dermatology, paediatrics and genito-urinary medicine, along with other services.

Bouygues' subsidiary, ETDE, was awarded the 30-year contract for maintenance and management of the hospital, and is responsible for cleaning, laundering, catering, and patient transportation.
